Code Setup

Make Copy of Sheet

- Make copy of google sheet

- This image has an attached url to the google sheet

Open App Script

- Go to extensions > Apps Scripts

- This is where you will deploy the desk package system

The screenshot shows a Google Sheets interface titled 'Copy of SetupPractice'. The menu bar includes File, Edit, View, Insert, Format, Data, Tools, Extensions, Help, and Signature Viewer. The 'Extensions' menu is open, displaying a search bar with 'Menus' and a list of add-ons: Add-ons, Macros, Apps Script (highlighted with a red box and a red arrow), AppSheet, Looker Studio, and GPT for Sheets™ and Docs™. The spreadsheet below has columns labeled id, first_name, last_name, and type, with row 5 selected.

	A	B

Libraries

Services

```
1  const SHEET_NAME = "Deliveries";
2  const ACCESS_GROUP = 'package_desk_access_list@stedwards.edu';
3
4  function getDeliveriesSheet_() {
5      const ss = SpreadsheetApp.getActiveSpreadsheet();
6      const sheet = ss.getSheetByName(SHEET_NAME);
7
8      if (!sheet) {
9          throw new Error(`Sheet "${SHEET_NAME}" not found.`);
10     }
```

Update To Google Group

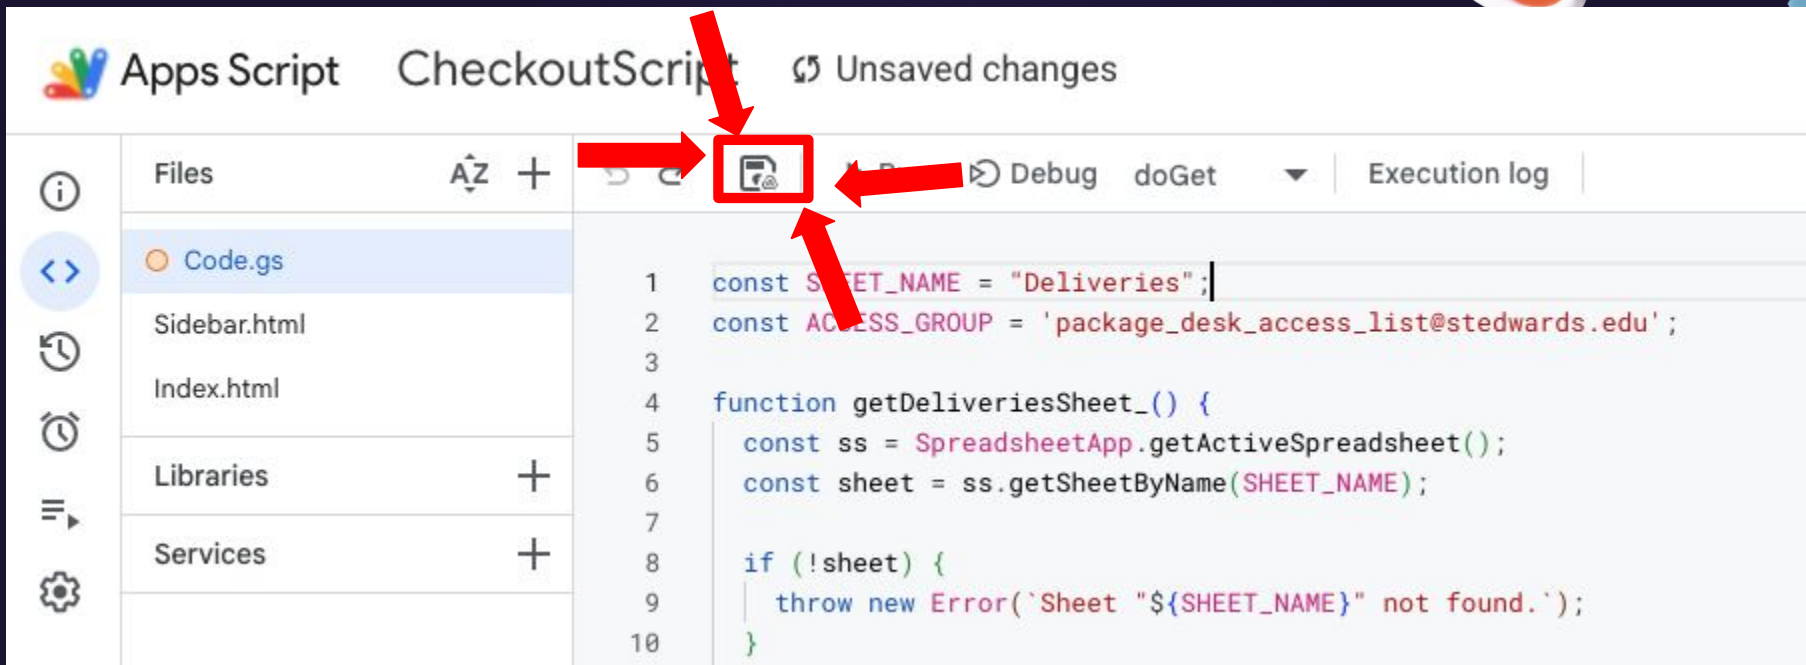

- Update the access group to your google groups URL

The screenshot shows the Google Apps Script editor. The top bar displays the Google logo, the text 'Apps Script', and the project name 'CheckoutScript'. Below this is a toolbar with icons for information, undo, redo, save, run, debug, doGet, and execution log. The left sidebar contains a 'Files' panel with a list of files: 'Code.gs' (selected), 'Sidebar.html', and 'Index.html'. Below the files are sections for 'Libraries' and 'Services', both with a plus sign to add more. The main area shows the code for 'Code.gs':

```
1  const SHEET_NAME = "Deliveries";
2  const ACCESS_GROUP = 'package_desk_access_list@stedwards.edu';
3
4  function getDeliveriesSheet_() {
5      const ss = SpreadsheetApp.getActiveSpreadsheet();
6      const sheet = ss.getSheetByName(SHEET_NAME);
7
8      if (!sheet) {
9          throw new Error(`Sheet "${SHEET_NAME}" not found.`);
10     }
```

Press Save Button

The screenshot shows the Google Apps Script editor interface. At the top, the title bar reads "Apps Script CheckoutScript" followed by a warning icon and "Unsaved changes". The left sidebar contains a "Files" section with a list of files: "Code.gs" (selected), "Sidebar.html", and "Index.html". Below this are "Libraries" and "Services" sections, each with a plus icon. The main editor area displays JavaScript code for a function named `getDeliveriesSheet_()`. A red box highlights the Save button (a floppy disk icon) in the top toolbar. Three red arrows point towards this button: one from the top, one from the left, and one from the bottom.

```
1 const SHEET_NAME = "Deliveries";  
2 const ACCESS_GROUP = 'package_desk_access_list@stedwards.edu';  
3  
4 function getDeliveriesSheet_() {  
5   const ss = SpreadsheetApp.getActiveSpreadsheet();  
6   const sheet = ss.getSheetByName(SHEET_NAME);  
7  
8   if (!sheet) {  
9     throw new Error(`Sheet "${SHEET_NAME}" not found.`);  
10  }
```
